

ACRNA 2019 Conference Melbourne

The second annual ACRNA 2019 Conference closed on Thursday, 31st October, after three days of excellent content, discussion, site visits, workshops and fellowship.

67 delegates participated with 11 presentations, a dinner guest speaker, 7 live hosted control room site visits, 2 workshops showcasing emerging design and operations technologies, and introductions to two of our colleagues representing peak industry bodies with whom ACRNA can be developing industry relationships.

In due course, there will be fuller reports and presentations posted on the website at <https://acrna.org/events/#conference>

ACRNA 2019 Annual General Meeting

The ACRNA held its 2019 Annual General Meeting on Day 3 of the conference.

40 delegates attended.

As well as acknowledging our individual members for their support, and our 7 corporate members, whose investment assures us each year of financial strength, the President, though absent, but through the chair, looked at the last year's

achievements and proposed a set of activities and goals for next year.

The Financial Report for the year ended 30th June 2019 was presented and adopted and will now be sent to the accountant for audit and lodgement with the Office of Fair Trading in our Annual Report.

The ACRNA Budget for 2019-2020 was presented and showed a strong result. Nevertheless, it is incumbent upon the Association to invest in member services and that is the challenge for the incoming Committee.

2020 Committee

The ACRNA is grateful to all those who nominated and accepted positions on the Committee:
