

Interactive:- High Availability Control & Operation Centres

The ACRNA and Interactive invite members to an event where a tour will be provided of their control room facility, business continuity sites for long or short term use and data centre. Interactive services protect critical business functions and can provide a secure managed facility on a full time basis or for your staff in the event of a disaster.

The event will involve a short presentation of the services Interactive offer followed by some sponsored food and drink allowing members to catch up and network outside of the annual conference.
